

WESTCORE SMALL-CAP OPPORTUNITY FUND

FACT SHEET | June 30, 2010

STRATEGY

- Seek to invest in small-cap companies generating positive free cash flow and improving returns
- Use an integrated investment approach that combines proprietary quantitative screen and original fundamental research
- Employ bottom-up, team-based stock selection process
- Emphasize strict adherence to our style and risk control measures

Investing in small-cap funds generally will be more volatile and loss of principal could be greater than investing in large-cap funds.

¹Performance data quoted represents past performance and does not guarantee future results. Performance information for the institutional class shares prior to their inception date is based on the performance of the retail class. Current performance may be lower or higher than the performance quoted. To obtain current performance, visit www.westcore.com. Average annual total returns reflect the reinvestment of dividends, capital gains distributions, all fee waivers and expense reimbursements. The performance data quoted does not reflect the deduction of the 2% redemption fee imposed if shares are redeemed or exchanged within 90 days of purchase. If imposed, the fee would reduce the performance quoted. Investment return and principal value will vary, and shares, when redeemed, may be worth more or less than their original cost. Westcore fund shares are not insured by the FDIC, the Federal Reserve Board or any other agency and are subject to investment risk.

²The Fund's Advisor and Administrators have contractually agreed to waive a portion of the investment advisory and/or administration fees and/or to reimburse other expenses for the retail class until at least April 30, 2011. For the institutional class, the Advisor has contractually agreed to waive and/or reimburse its proportionate share of the retail class waiver and/or reimbursement plus the ongoing class-specific expenses until at least April 30, 2011. Without the fee waivers and expense reimbursements, total return figures would have been lower.

⁸Past performance does not guarantee future results. These stocks do not represent all of the securities purchased, sold or recommended by the Funds' Adviser. The methodology used to construct this chart took into account the weighting of every holding in the Fund that contributed to the Fund's performance during the measurement period. The contribution of each Fund holding was consistently determined by calculating the weight of each holding multiplied by the rate of return for that holding during the measurement period. To request a complete list of the contribution of each Fund holding to overall Fund performance, please call 800.392.CORE (2673) or email invest@westcore.com.

The Russell 2000 Index is an unmanaged index that consists of the smallest 2000 companies in the Russell 3000 Index. The Russell 3000 Index represents 98% of the investable U.S. equity market. Investors cannot invest directly in the index.

The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. During periods on which ratings are based, service providers of the Fund waived fees. This waiver had a material impact on the funds' average annual returns. In the absence of fee waivers, performance would have been reduced. Lisa Ramirez is a registered representative of ALPS Distributors, Inc.

DEFINITION OF TERMS

Alpha: A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk.

Beta: A measure of a fund's sensitivity to market movements. The beta of the market is 1.00 by definition. A beta above 1 is more volatile than the overall market, while a beta below 1 is less volatile.

Information Ratio: Measures excess return and risk relative to a specific benchmark indicating how much a fund outperformed the benchmark per unit of additional risk taken.

Long-Term Debt/Capital: A measurement of a company's financial leverage, calculated as the company's debt divided by its total capital.

Market Capitalization: Represents the total value of a company or stock.

Price/Book Value: Used to compare a company's book value to its current market price.

Price/Cash Flow: A measure of a firm's stock price relative to its financial performance.

Price/Earnings: A stock's per share price divided by its per share earnings over a 12-month period.

Return on Assets: A measure of a company's profitability relative to its total assets.

R-Squared: A measurement of how closely a fund's performance correlates with the performance of a benchmark.

Sharpe Ratio: A measure of the excess return achieved for a certain level of risk.

Standard Deviation: A statistical measure of the historical volatility of a fund.

Tracking Error: A measure of how closely a fund follows the index to which it is benchmarked.

Weighted Avg Discount to Est. Intrinsic Value: The measure of a portfolio's estimated value.
